

Instability in Northern Bridgers

Date

Mon, 02/05/2024 - 09:55

Activity

Skiing

Toured up near fairy lake today. Several natural avalanches on Pomp, Sac, and Naya Nuki. Numerous whumphs traveling through the meadows. Did a quick pit on an eastern aspect at 8000'. HS110cm. ECTN8 at the melt freeze crust 95cm and ECTP21 at 65cm on some 1-2mm facets. By about 10:30AM winds were picking up and we boogied out of there.

Region

Bridger Range
