

Large Crowns in Hyalite

Date

Mon, 02/19/2024 - 09:00

Activity

Ice Climbing

From the approach trail to Mummy II we saw two large crowns on the ridge associated with Mt. Bole. Not sure when they happened, but they looked pretty big! Observed Monday morning, February 19

Region

Northern Gallatin

Location (from list)

Mt. Bole

Observer Name

Matteo Bjornsson
