

Small wind slabs on Buck Ridge

Buck Ridge
Northern Madison
3/16/2025
Code
SS-AMc-S
Elevation
9000
Aspect
N
Latitude
45.17190
Longitude
-111.38000
Notes

Up to a foot of soft snow which seemed to have included a few inches from last weekend. Winds were transporting snow across Buck Ridge all day long.

We triggered two small and shallow wind slabs that didn't go anywhere, but they were a warning of bigger wind slabs on bigger slopes. We didn't find any faceted or weak layers of concern in the snowpack.

Wind slabs will grow in size overnight and will be the main concern tomorrow. Fortunately they will be easy to see and avoid.

Number of slides
2
