Snow Pit Profile
Goose Creek
Reartooth MT

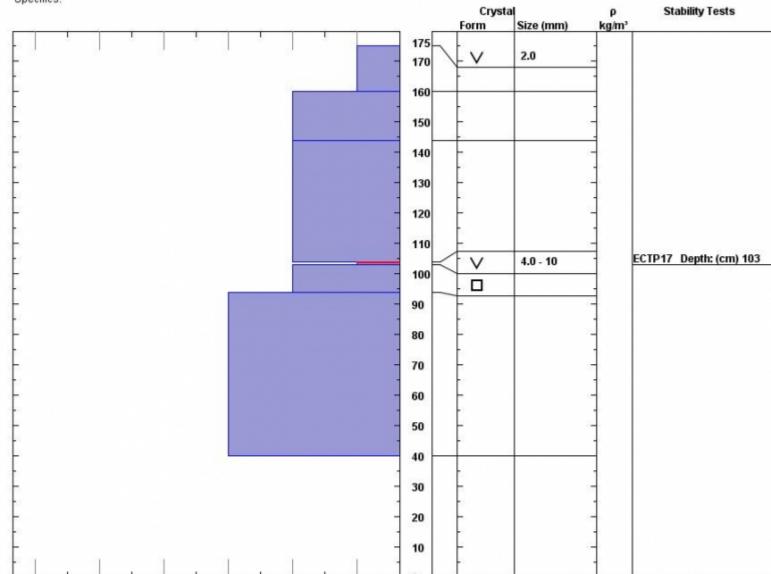

Observer: Mark Staples Tue Dec 17 12:45:00 MST 2013 Stability on similar slopes: Air Temperature: **C** Stability Test Notes: 103: popped out Layer note 103-104: F

Beartooth, MT Elevation (ft) 9567 Aspect: 340 Co-ord: 45.08220 N 109.94079 W Slope: 26

Wind loading: no

Sky Cover: Precipitation: Wind: Calm

Specifics:

I K P 1F 4F F

Notes: See pit from 11-27 in this area at: http://www.mtavalanche.com/images/13/goose-creek-pit?size=_originalWe found surface hoar on Henderson Died. It was at the exact same location. HS there was 165cm and stability test result was ECTP17/13. All other layers in this pit felt solid and it we easy to miss the surface hoar without a stability test.
